Jacob presented and reviewed with the board the District's activity to date. Michelle and Jacob advised that the District has had an ongoing issue with a farmer in the District that is continuing to have issues with standing water that is a breeding source of mosquitos and a nuisance. They report that they have on several occasions to discuss the issue with the farmer, but have had very little cooperation from him. They desire to obtain board approval to send a revised contact letter advising the farmer and landowner of District ability to abate the nuisance and the potential costs associated therewith. After extensive discussion, the board directed the District's management to attempt to have a personal meeting with the farmer to determine if they could reach an agreement how to address the situation for the next season. The board further directed that the general manager revise the contact letter and send it to district counsel for review before placing the matter back on the agenda for consideration.

Agenda Item No. 9: Discussion, Consideration and Action to Approve Purchase of a Trailer for the Drone Program.

Jacob advised the board that the District's drone program is now operational and has flown numerous applications throughout the District. He advised that presently the drone and all required equipment is transported in the back of a truck, which he advised is difficult, not secure and not efficient. He advised that it would be preferable for the District to purchase an enclosed trailer for the drone program, which could transport and house the drone, chemicals, equipment, and other items necessary for the program. He provided the board with numerous quotes and bids for enclosed trailers. After considerable discussion, the board provided Jacob with additional feedback and trailer features they desired and requested that he obtain updated quotes and bids according thereto to consider at the next board meeting.

TEST PROTOCOLS

Humans:

Specimens are tested by local laboratories with an IgM or IgG immunofluorescent assay (IFA) and/or an IgM enzyme immunoassay (EIA). Specimens with inconclusive results are forwarded to the California Department of Public Health Viral and Rickettsial Disease Laboratory (VRDL) for further testing with a plaque reduction neutralization test (PRNT).

Dead Birds

Oral swab samples collected from bird carcasses are tested at the UC Davis Arbovirus Research and Training laboratory (DART) or at a local agency for West Nile virus by RT-qPCR.

Sentinel Chickens:

Dried blood spot samples from sentinel chickens are tested at the California Department of Public Health Vector-Borne Disease Laboratory for IgG antibodies to West Nile, St. Louis encephalitis, and western equine encephalomyelitis viruses by an EIA. Positive samples are confirmed by IFA, western-blot, or PRNT.

Mosquito Pools:

Mosquito pools are tested at DART or at a local agency for West Nile, western equine encephalomyelitis, and St. Louis encephalitis viral RNA using a multiplex RT-qPCR. Invasive *Aedes* mosquitoes (*Ae. aegypti* and *Ae. albopictus*) are also tested at DART for chikungunya, dengue, and Zika viral RNA by a separate RT-qPCR.

Re: No Paid Property/Liability Claims in 2022-23

Dear Mr. Pitiigliano,

This letter is to formally acknowledge the dedicated efforts of the Tulare Mosquito Abatement District's Governing Body, management, and staff towards proactive risk management and loss prevention training. Your agency's efforts have resulted in no "paid" property/liability claims for program year 2022-23. A "paid" claim for the purposes of this recognition represents the first payment on an open claim during the prior program year and excludes property claims. This is a great accomplishment!

In addition to this annual recognition, members with no "paid" claims during 2022-23 earned one credit incentive point (CIP), thereby reducing their annual contribution amount.

As SDRMA is dedicated to serving its members and preventing claims, we would appreciate your agency taking a moment and sharing with us what made your District successful in preventing property/liability losses. Our goal is to incorporate your successful ideas and suggestions into our loss prevention programs to benefit all members of SDRMA. Please forward any comments or suggestions to us at memberplus@sdrma.org.

On behalf of the SDRMA Board of Directors and staff, it is my honor to congratulate the Governing Body, management, and staff for their commitment to proactive risk management and loss prevention training.

Sincerely,
Special District Risk Management Authority

Sandy A. Seifert-Raffelson, President
Board of Directors
